Making business successful for over 4 years

2017

2018

People are looking for timeshare exit companies are growing and anticipating a new cost effective way to travel over the past 4 years.

According to the Booking.com sustainability travel report, “over half (55%) of global travelers report being more determined to make sustainable travel choices than they were a year ago, but barriers include a lack of knowledge and available or appealing options when trying to put this into practice.” (Booking.com 2019).

People are looking for a new unique way to travel and after exiting their Timeshare you can fill that need by including Exploritravel.

Timeshare exit and Resales

There is no upfront costs or fees in order to use us or have us available to your customers. Most customers who own a timeshare bought it because they like to travel but got caught up in the contracts and maintenance fees that they can no longer find beneficial. Because they still like to travel this is an alternative that can be given with confidence that they will love and use it without having the stipulations that they are letting go of. It closes 15% more sales as well as gives customers something to look forward to after leaving their timeshare. Many businesses offer this as a free service to the customers.

Cost to the client

After each closing or sale a one time fee of \$495 would be paid to exploritravel for activation of the customer's lifetime membership. This membership would require them to have a yearly renewal fee of \$199 which can be paid with their reward credits. That fee does not ever increase and is not a maintenance fee. The customer is not interested in a lifetime membership which can be transferred they can take the free one year membership and they will not be required to pay a renewal fee and less they decide to renew and if they do they can continue so for each year and till they decide they don't want to use it anymore.
